

POCKET PENETROMETER (SOIL)

Standard: ASTM D 2573-94

Proctor Penetrometers

For used to obtain quickly and easily an approximate measure of the shear strength of cohesive and semicohesive soils. Direct-reading scale in kgf/cm² - corresponds to equivalent unconfined compressive strength. Indicator sleeve retains reading after piston is release.

Technical Specifications :

Model Number	NL 5014 X / 001
Range	0 - 5 kgf/cm ²
Dimension (mm)	20 mm Dia. x 173 mm lgth
Approx. Weight	0.5 kg
